### Treasure Quest Mechanical Reel System

Combining the excitement of actual reels with the **Live-Call Bingo™** real-time bingo platform, VGT's Mechanical Treasure Quest game terminal (patent pending) has grabbed a large portion of the Oklahoma Class II gaming market.

Each terminal uses mechanical stepper motors controlled by VGT's proprietary technology to display the **Live Call Bingo™** outcome. This allows players to see the familiar "spinning reel" interface while playing this popular Class II gaming product. The first bingo-based mechanical reel game offered for play in Class II markets, the Mechanical Treasure Quest game terminal has established a reputation for reliability and unmatched player appeal.

Available in VGT's revolutionary narrow cabinet, the mechanical Treasure Quest game terminal is available in a number of popular game faces. With proven game characters and reliable components, the mechanical Treasure Quest game terminal combines the features of the **Live Call Bingo™** platform with one of the most appealing games in the Class II marketplace.

**LIVE-CALL BINGO**

All of VGT's Mechanical Reel Systems feature the **Live Call Bingo™** platform.

### Cabinet Styles

VGT offers the Treasure Quest Video Multi-game system in your choice of three cabinets: a traditional upright cabinet; a slant-top cabinet or VGT's innovative Thin-line single and dual game cabinets.

#### Traditional Cabinet

A steel cabinet with all the features you've come to expect from the leader in Class II games.

- 25.5" wide
- 26" deep
- 80" tall

#### Thin-line Single Game System

Just 18" Wide!

#### Thin-line Single Cabinet

VGT's design is one of the slimmest in the industry, taking up half the space of a traditional device.

- 25.5" wide
- 18" deep
- 80" tall

#### Thin-line Dual Game System

Only 36" Wide!

#### Thin-line Dual Cabinet

VGT's innovative design lets casinos put two games in the floorspace typically taken by one device.

- 28" wide
- 36" deep
- 80" tall
